Vehicle Tracking At Its Best

Omega GPS A New Level Of Vehicle Security And Family Safety

Omega GPS is an Internet-based GPS tracking system that maps the current location, speed and direction of your vehicle, anywhere, nationwide.

It uses the powerful Microsoft Virtual Earth™ mapping interface, giving you up to three unique views of the vehicle's location:

- Traditional Street Map
- Aerial Satellite
- In Major Cities – “Bird’s Eye”

Alerts ...

Omega GPS Alerts You By E-mail Or Text Message If ...

- Your vehicle's alarm system is activated
- The vehicle exceeds a pre-selected speed
- The vehicle moves beyond a pre-selected distance—Geo-Fence
- The vehicle's battery is low

If you subscribe to our enhanced Personal Assistant service, all alerts will also be delivered by a live phone operator 24/7.

Powerful Features ...

Geo-Fence— alerts you if the vehicle moves beyond a pre-set security perimeter. This security feature adds a critical layer of protection if a thief overrides the alarm system and drives or tows away your vehicle. The geo-fence can be set from a 1/8 to 300 mile radius, and can automatically activate at specific times every day.

Auto Tracking—When your vehicle has been stolen, or when you need detailed tracking information, this feature automatically records the vehicle's location at pre-selected intervals from five minutes to 24 hours.

High-Tech With A Personal Touch ...

Live Support Specialists, and enhanced, optional services like Personal Assistant and Theft Recovery Specialists make using your system stress free.

To activate the system, simply call our live phone support specialists. They will help

configure your system, demonstrate its features, and explain pricing options, including multi-year discounts and optional enhanced services.

Enhanced Service Options ...

Live 24/7 Personal Assistant— Operators are always available by phone when you can't access the Internet. The Personal Assistant can track your vehicle, send vehicle control commands and contact you with warning notifications.

Theft Recovery Assistants— These specially-trained assistants help coordinate tracking and recovery efforts with law enforcement officers if your vehicle is stolen.

Omega GPS For Family Protection ...

When a loved one is late or unaccounted for, you can find the exact location of the vehicle to verify their safety.

Speed Trap— alerts you if your vehicle exceeds a pre-selected speed, to warn of dangerous driving. You can select any 5 mph increment from 45 to 95 mph.

Geo-Fence— can be used to monitor and control the travel restrictions of young drivers.

Low Battery Alert— If the vehicle's battery is low, Omega GPS alerts you to prevent being stranded with a dead battery.

You Only Pay For What You Need ...

The installation price includes one year of service and 24 uses. When you need additional uses and enhanced assistant support, simply order on-line. Multi-year discounts make Omega GPS an affordable security investment.

Easy To Configure And Operate ...

Omega GPS is always accessible from any Internet-connected computer. There is no software to install, maintain, or upgrade. The user-friendly interface is easy to operate, but offers sophisticated features, including control of multiple vehicles from one login. Detailed history logs track all locations, commands and alerts.
